

## Description of the illustrated machinings

- |   |  |   |   |
|---|--|---|---|
|  | Tests of complicated machinings.               |  | Special macro tests                           |
|  | Aluminium section for car roofs.               |  | Mobile doors for kitchens                     |
|  | Extruded counter-plate for door lock.          |  | Notch for industrial door hinge               |
|  | 56 pieces each bar cutting.                    |  | Very thick steel particular                   |
|  | Threading tests with FLOWDRILL special tool    |  | Curtain-wall mullion                          |
|  | Fiberglass section for step ladders            |  | Sliding guides for sailing boat               |
|  | External PVC profiles                          |  | Aluminium pipe for car-wash stations          |
|  | Internal chamber of aluminium                  |  | Machinings on removable side panels of trucks |
|  | PVC profile                                    |  | Guiding profile for trucks awnings            |
|  | Steel profile                                  |  | Ends of shading panels                        |
|  | Thermal break on an aluminium profile          |  | Industrial hinges                             |
|  | Forster steel section with internal insulation |  | Industrial profile                            |
|  | Accessory                                      |  | ABS panels                                    |
|  | Wood/aluminium section                         |  | Machinings on an aluminium moulded profile    |
|  | Particular of a container cargo                |  | Copper bar for turbine armatures              |
|  | Curtain-wall mullion                           |  | Holes on a steel pipe                         |
|   |  |  | Industrial profile                            |
