Number of punches	6 (3per leg)	6 (3per leg)
Maximum diameter	31mm	31mm
Punching force	730 KN	730 KN
Shearing force	1900KN	2500KN
Feeding speed	Programmable up to 36m/min	
Positioning accuracy	+/- 0.25mm +/- 0.15mm/m	

ALPS 150 & 160

The ALPS product line is a complete automatic solution for punching, marking and shearing of angles for medium and large sized steel profiles. Its ergonomic design, all-purpose functionality and proven performance enable a greater range of operations and produce a wider variety of pieces. Low cost and high quality, with the added extra of allowing you the flexibility to process flat bar and U profiles as well. The ALPS line can be customized to fit specific needs.

OPTIONS

- Automatic side loader
- Software line PRO
- Automatic unloading system
- Automatic waste system
