

ABM 76 CNC3

Mandrel Tube Bending Machine

FEATURES

- High quality CNC hydraulic bending system
- 4 or 6 metre machine sizes
- Simple or complex shaped bending of steel, stainless steel, aluminium and similar materials
- Hydraulic assistant axes
- Servo controlled linear movement and turning axes
- Servo axis speed can be controlled from the operator console
- Foot pedal control
- Step by step and fully automatic modes
- Three line dies operational ability
- Can operate with or without mandrel
- Auto-lubrication for mandrel
- Hydraulic oil cooler
- Intuitive 15" colour touchscreen HMI
- Possible to program in YBC mode
- Tube length can be calculated according to part program
- 3D preview of written program
- Intuitive operation allows for rapid progress from training to serial production
