

The steel working company

SEMI PAXY *

The SEMI PAXY is a CNC plate positioning and punching system. This is an x-y axis coordinating positioning table with programmable stops. The assembly can be factory mounted on new machines, but also added to existing machines. The HYDRACROP or PUMA machine must have a throat depth of at least 500mm.

VERSIONS

X1000: for material with a maximum length of 1000 mm
XPlus: modules in length 2000, 3000, 4000 & 5000 for longer material.

The maximum material widths are:

- 400mm for mounting on HYDRACROP or PUMA with throat of 500mm
- 500mm for mounting on HYDRACROP 110SD & 165SD
- 650mm for mounting on PUMA with throat of 750mm

Picture shows HYDRACROP 110SD with SEMI PAXY PC 1000 x 500 & ALRS

X displacement speed	0-12m/min
Y displacement speed	0-12m/min
Precision of positioning	+/- 0.2mm/min
Repeatability	+/- 0.1mm
