

The steel working company

PAXY

The PAXY range offers CNC solutions for automated punching of steel plates. The PAXY line automates tedious and time-consuming preliminary tasks, such as centre marking and manual positioning. These solutions maximize productivity, reduce cost and increase accuracy.

VERSIONS

PAXY 1000/1500/2000 is a fully automated system for punching thick steel plates (4-40mm), up to a size of 2000 x 750mm. By automating the feeding and positioning process, steel plate punching becomes faster and easier.

PAXY X PLUS is designed for automated punching of long steel plates up to a length of 18000mm and thickness of up to 40mm. The plate is firmly held in place by clamping guides which control movement along the X axis. The punching unit mounted on a carriage controls movement along the Y axis.

FEATURES	Paxy 1000	Paxy 1500	Paxy 2000	Paxy X Plus
Max length	1000mm	1500mm	2000mm	3000-18000mm
Max width	500mm	750mm	750mm	750mm
Max thickness	40mm	40mm	40mm	40mm
Max diameter	40mm	40mm	40mm	40mm
Number of punches	Up to 3	Up to 3	Up to 3	Up to 3
