

M-type Roller Conveyors

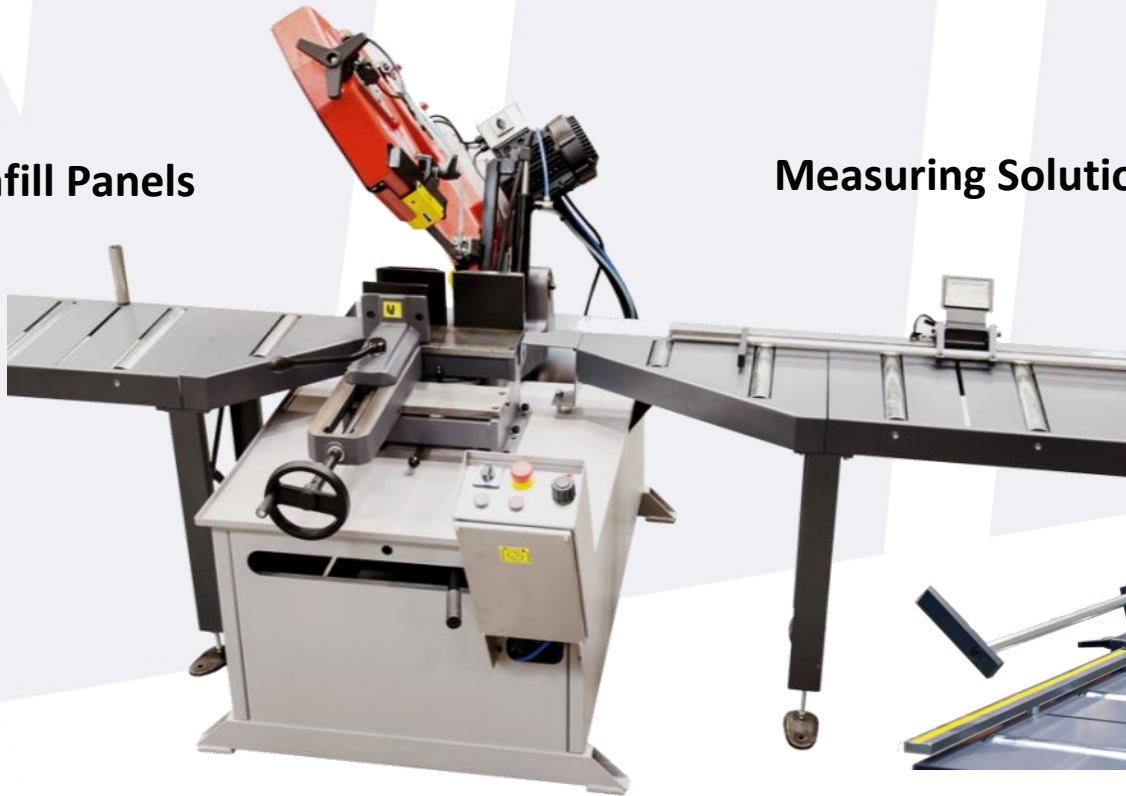

FEATURES

- The M-type Conveyor is manufactured using 60mm Ø steel rollers with a maximum loading of 150kg/m (evenly spread)
- Alternatively, the M-type can be supplied with plastic rollers to prevent possible marking of material (maximum loading 15kg/m)
- Supplied in 2m & 3m lengths, easily connected into continuous runs
- Available with roller widths of 230, 330 or 430mm
- Conveyor height can be adjusted between 730 & 1,130mm
- Rollers are positioned at 275mm centres

Options for M-type Roller Conveyors:

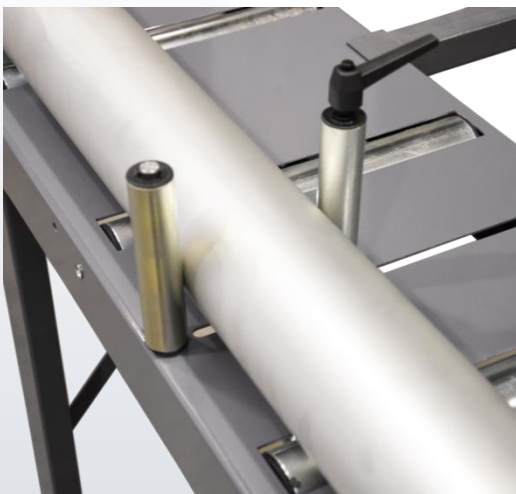

Mitre Infill Panels

Measuring Solutions*

Vertical Roller Set

Stillage Arms

*Different systems are available. See separate datasheet for more details.
